

Invented in Sweden

# REAL WOOD REINVENTED

**A real wood floor with great design, durability and water proof characteristics. Built for a worry-free life.**

**100%  
REAL WOOD**

**3X STRONGER  
IMPACT RESISTANCE**

**WATERPROOF  
& WORRY-FREE**

**XXL PLANK  
DIMENSIONS**

**SUSTAINABLE  
MANUFACTURING**

**FLOOR & WALL  
WITH 5G® CLIMB™**

The patented Woodura® surface technology is based on fusing a thin sheet of wood with a Compositex™ core through a powder mix layer. The powder mix perfectly fills up the natural openings of the wood and enhances the wood appearance. Moreover, it eliminates the need for putty operations and creates a significantly stronger surface with a hardness significantly greater than a traditional solid wood floors. A unique Välinge Flooring feature is the ability to install the floor without expansion profiles, for areas as large as 625m<sup>2</sup>.

**A more sustainable alternative** With the patented Woodura® surface technology, you get a more sustainable alternative to traditional Parquet. Välinge Flooring utilizes the patented Woodura® surface technology, maximizing the floor surface from every log. By using sliced wood instead of solid wood, 10 times more flooring can be produced from the same amount of lumber, compared to traditional engineered wood flooring. Our raw material are collected from responsibly managed forests, where the wood is processed locally. This sustainable way of harvesting and producing means the forest will still be there to enjoy for generations to come.

## Product design

1. UV Acrylic Top Coat (Hardwax oil on request)
2. Natural wood covering
3. Wood-based powder layer
4. Välinge Compositex™ core
5. Wood-based powder layer
6. Wood backing layer

## 5G® Dry™ waterproof technology with a high moisture resistant Compositetek™ core

5G® Dry™ is a fold down installation system that provides enhanced water-resistance by preventing water from penetrating into the seams of the floor panels. With greater protection to withstand the mess of everyday chaos such as spills, this innovation makes floors both incredibly easy to

install and to live with. In wood-based floorings, 5G® Dry™ contributes to significantly lower edge swelling, thereby ensuring that the floor both looks and feels better despite being subjected to wet mopping, accidents and other events resulting from everyday use.
